

- Engineering and Project Management Services in the power industry on global projects.
- Technical engineering support for customers considering changes in fuel, upgrades, control systems or experiencing increased energy costs or asset obsolescence.
- Economic feasibility studies supporting our industrial and power clients on global projects. Full service project management and engineering support from the development phase up to and through project completion.

CTG Engineering consists of a team of experienced power plant professionals with significant Project Management and Project Engineering experience, supported by complete in-house engineering and design support.

CTG Engineering's staff of highly experienced and dedicated professionals work tirelessly on behalf of our clients to complete projects within budget and on schedule.

CTG Engineering team members have worked on over 100 turnkey powerplant assignments around the world including Aeroderivative and Frame Gas turbine projects in simple, combined and co-generation applications, solid fuel projects, and several renewable energy projects

Our Team has completed projects in refineries, coking facilities, pulp mills, land fill gas sites and on waste-to-energy sites.

- CTG Engineering, LLC. (CTG-E) is a privately held in-house engineering firm and operates as a wholly owned subsidiary under the parent corporation, The Camelot Technologies Group, Inc. (CTG) [www.camelottech.com](http://www.camelottech.com). CTG-E is located in the heart of downtown Portland, Maine .
- CTG Engineering provides design and consulting engineering services for all of your power generation needs. CTG Engineering provides expertise as both a stand alone service or part of your engineering, procurement and construction project ( EPC) contract.
- Our services include project planning and feasibility engineering, process engineering and design basis, detailed engineering, construction site planning and supervision, commissioning and start-up, and operator training for biomass, diesel and gas turbine power plants.
- Our client base is as diverse as the services we offer. Each client has special needs, and CTG Engineering strives to provide innovative and efficient design solutions to meet or exceed our clients' needs .

## KEY BUSINESS PRINCIPLES

Attend to each client's specific needs with our diverse set of design and consulting engineering technical services.

Listen to our clients to understand their business and financial needs.

Collaborate internally on recommendations for our clients.

Build long-term relationships within our buyer and vendor network.

Execute our assignments with the utmost integrity, quality, and professionalism.

Create value for the client by being creative, adept and cost conscious.

CTG Engineering is a global full service engineering services contractor. We specialize in a wide range of engineering services including:

- Preliminary Engineering Studies & Analysis
- Detailed Design
- Systems Design
- 3-D Modeling
- Controls System Support
- On-site Customer Support
- Construction Management

- OEM Procurement Services
- Balance of Plant Equipment Procurement Services
- Project Management
- Engineering
- Startup & Commissioning
- Operator Training
- Operations and Maintenance Support
